Reading Material
Advanced Programming Techniques

Handouts:

There aren’t many handouts for this class except quizzes, their solutions, programming exercises, and programming projects (assignments). Any such handouts will be available in the handouts section of the class web page. You are responsible to print those yourself from:

http://suraj.lums.edu.pk/~cs292w03

We will request a print quota of 200 pages for each registered student.

Recommended Books:

3. C++: How to Program by Deitel and Deitel
4. The C++ Programming Language by Bjarne Stroustrup
5. MFC Programming from the Ground UP, Herbert Schildt
