| Open for Student Category  | SDSB(Sophomores & Juniors), Open for All in phase II |
| Close for Student Category | Freshmen   |

#### COURSE DESCRIPTION

This course introduces undergraduate students to key social policy issues in Pakistan. It satisfies the information and analysis needs of future managers and practitioners in the public and development sectors. It covers a wide range of topics, including poverty, social exclusion, social safety nets, education, health, food security, demography and housing. Students use recent data to critically analyze policy goals, delivery mechanisms and available policy choices on each of these topics.

**Further Details:** This course responds to a market demand for graduates who can effectively apply their understanding of social issues to policy making and management in public and nonprofit sectors. Such growing demand has its roots in four recent developments. First, governments at federal, provincial and local levels have warmed up to the idea of attracting talent from the private sector to improve delivery of social services, instead of relying exclusively on the traditional civil service. Thus, we see various governments advertising positions at entry and middle/senior management levels in state-owned-corporations, autonomous organizations, publicly funded nonprofits and attached departments. Second, the number of government organizations working under a corporate governance structure has increased substantially over the past two decades (e.g. National Database and Registration Authority (NADRA), Earthquake Relief and Rehabilitation Authority). Third, the private sector now plays an increasingly large role in provision of several social services, including education and health, leading to the emergence of large school-chains and hospitals. Fourth, local and foreign NGOs and international aid agencies now play an important role in policy formulation and in delivery of social services. The combined effect of these developments is to create employment opportunities for professional managers in the social sector. These are attractive career positions for LUMS graduates.

This course will help LUMS students in pursuing a future career in public and nonprofit sectors. By introducing students to contemporary issues and challenges in social policy, it will expose them to the working of the government, local and foreign NGOs, international aid agencies and private providers of social services. All of them are prospective employers. A broad overview of their governance structures, mandate, operational strategies and challenges will help students in job interviews. The course will act as a foundation course for students who intend to continue education in the fields of public management and public policy.

## Lahore University of Management Sciences

Topics included in the course have been carefully selected based on their relevance for future career pursuits of LUMS students. These correspond to: 1) areas in which a government organization has recently advertised entry level or mid career positions; or 2) important program activities of the nonprofit sector and private providers of social services. Examples of the former are: Prime Minister’s Program Delivery Unit; Power Generation and Distribution Companies; NADRA; District Education and Health Authorities. Examples of the latter are: school chains; various projects of the USAID, CIDA, the World Bank and other donors.

As a survey course, there is a natural tension between breadth and depth – between the number of topics addressed and the amount of attention given to each topic. In this course, the emphasis is on breadth and the overarching goal is to convey to students policy dilemmas faced by public managers in Pakistan.

The course will comprise a series of 75-minute interactive lectures on topics identified below. These lectures will provide students an opportunity to critically analyze policy and implementation challenges in areas important for their professional careers. Students will be required to read prescribed texts before coming to the class. On average, this will comprise 20-25 pages of reading per session. During the class, they will be provided a structured overview of the issue/challenge. The structured overview (usually a presentation by the instructor) will be grounded in theory but will present a practitioner’s perspective in each case. Specific examples from real life will be used to illustrate the policy challenge under discussion. Students will be expected to critically analyze policy questions during class discussions.

|  | <p><b>Major Specific Learning Goals &amp; Objectives</b></p> <p><b>Goal 7 (a) – Discipline Specific Knowledge and Understanding</b><br/> <b>Objective:</b> Students will demonstrate knowledge of key business disciplines and how they interact including application to real world situations (including subject knowledge).</p> <p><b>Goal 7 (b) – Understanding the “science” behind the decision-making process (for MGS Majors)</b><br/> <b>Objective:</b> Students will demonstrate ability to analyze a business problem, design and apply appropriate decision-support tools, interpret results and make meaningful recommendations to support the decision-maker</p> |
|--|--|

Indicate below how the course learning objectives specifically relate to any program learning goals and objectives.

| PROGRAM LEARNING GOALS AND OBJECTIVES                                       | COURSE LEARNING OBJECTIVES   | COURSE ASSESSMENT ITEM                              |
|---|--|---|
| Goal 1 –Effective Written and Oral Communication                            | Critically analyzing social policy issues will enhance students’ written and oral communication skills.  | Group presentations and (mid-term and final) exams. |
| Goal 2 –Ethical Understanding and Reasoning                                 | Most sessions involve an examination of specific circumstances of marginalized and socially excluded groups.   | As above.   |
| Goal 3 – Analytical Thinking and Problem Solving Skills                     | Students will identify and analyze key policy issues, and will propose solutions.  | As above.   |
| Goal 4 – Application of Information Technology                              | -  | Extensive use of MS office.                         |
| Goal 5 – Teamwork in Diverse and Multicultural Environments                 | -  | Presentations of group work.                        |
| Goal 6 – Understanding Organizational Ecosystems                            | Students will understand how governments, NGOs and donors work. They will examine substantial amounts of current data on various aspects of human well-being.  | -   |
| Goal 7 (a) – Discipline Specific Knowledge and Understanding                | By covering key themes in social policy, the course will help students develop critical insights in the disciplines of Social Policy and Development Studies. The content is comparable to standard undergraduate courses offered in foreign universities. | As above.   |
| Goal 7 (b) – Understanding the “science” behind the decision-making process | Students will critically analyze social issues and debate various policy responses.  | As above.   |

## Lahore University of Management Sciences

### LEARNING OUTCOMES

By the end of this course, students will be able to demonstrate the following:

1. Improved understanding of the working of governments at federal, provincial and local levels, NGOs, international aid agencies and private providers of social services
2. Enhanced appreciation of the complexity of policy and management challenges faced by these organizations in core areas of their operations
3. Increased ability to make informed policy choices in social sectors

### GRADING BREAKUP AND POLICY

Quizzes: 25%

- In all there will be 6 Quizzes; top 5 quizzes will be counted towards the final grade. Each Quiz will be worth 5% marks. Quizzes will be held at the end of each module and will cover readings in the entire module.

Mid-term Examination: 35%

- 8% key concepts; 27% analytical questions

Group Presentation: 15%

- In groups of 4-5 each, you will identify a policy question (different than the ones discussed in class), critically analyze it and share your analysis through a 10-minute PPT presentation. 10-minute Q&A will follow the group presentation.
- 5% marks will be awarded for individual contribution to the project, and 10% marks will be awarded to the entire group.

Final Examination: 25%

- 4% key concepts; 21% analytical questions

Note: **The minimum pass marks in this course are 55%.**

### EXAMINATION DETAIL

|              |   |
|--------------|---|
| Midterm Exam | Yes/No: Yes<br>Combine Separate:<br>Duration: 2 hours<br>Preferred Date:<br>Exam Specifications: <ul style="list-style-type: none"> <li>• Will comprise two parts: short answers on key concepts – 8%; essay questions – 27%</li> </ul> |
| Final Exam   | Yes/No: Yes<br>Combine Separate:<br>Duration: 2 hours<br>Exam Specifications: <ul style="list-style-type: none"> <li>• Will comprise two parts: short answers on key concepts – 4%; essay questions – 21%</li> </ul>                    |

**Note on Required Readings:** This is a reading intensive course and students are required to read the prescribed texts before each session. The average volume will be **20-25 pages per session**. Prescribed readings comprise academic papers, book chapters and reports. A list of key concepts and review questions will be provided before each session. These are meant only to stimulate your thinking. They do NOT comprise the syllabus for quizzes and exams.
