What is the difference between a flow chart and a structure chart? (2)

Each shape in a flowchart represents a single logical step whereas a shape in a structured chart represents a single logical part or procedure of a program.

Draw a flow chart for the following procedure. (8)

Procedure inputs: 
esi = pointing to the array  
ecx = array size

```
arraySum PROC
    push esi
    push ecx
    mov eax, 0
    L1:
    add eax, [esi]
    add esi, 4
    loop L1
    pop ecx
    pop esi
    ret
arraySum ENDP
```
